4. JIT compiler converts the_____ code into native code to the operating system.

a. CTS   b. CLS

c. CLR   d. MSIL

5. .NET is a _____ tool which supports many programming languages.

a. Operating System   b. Framework

c. database   d. testing

6. _____ is a huge collection of reusable classes, interfaces and value types that optimize the development process and provides access to system functionality.

a. FCL   b. CLR

c. CTS   d. JIT

7. CLS stands for _____.

a. Common Language Screen   b. Common Language Scheme

c. Common Language Specification   d. Code Language Similarity

8. Namespace is _____.

a. physical grouping of functionality related classes.   b. base data types.

c. logical grouping of functionality related classes.

d. user defined data type.

9. The system namespace includes classes that represent the _____.

a. base data types.

b. derived data types.

c. user defined data types.

d. none of above.

10. _____ is a set of base rules all the .net languages has to adopt to interoperate or communicate with each other.

a. CLR

b. CTS

c. CLS

d. MSIL

11. In the following options, _____ is a keyword in C#.

a. use

b. user

c. used

d. using

12. ASP stands for _____.

a. Active Several Pages

b. Active Server Protocol

c. Active Server Pages

d. Active Server Permissions

13. The data types which store the data directly into their memory locations is known as _____ types.

a. reference

b. value

c. implicit

d. explicit

14. Web.config file is used _____.

a. Configures the time that the server-side codebehind module is called.

b. To store the global information and variable definitions for the application.

c. To configure the web server.

d. To configure the web browser.

15. The _____ is an action triggered by user.

a. properties

b. method

c. event

d. none of these

16. The file extension of ASP.NET web form is _____.

a. docx

b. .jpeg

c. .aspx

d. .cs

17. _____ is not an ASP.NET page event.

a. Load

b. Init

c. Import

d. None of these

18. In ASP.NET application, DLL files are stored in _____ folder.

a. Bin

b. App_Data

c. App_Code

d. None of these

7/27/2022 11:11 AM

19. _____ is the first event of ASP.NET web page, when the user requests a web page.
a. Init   b. Load
c. PreInit   d. PreLoad

20. _____ is not an ASP component.
a. Counter   b. File Access
c. AdRotator   d. LinkCounter

21. A variable which is declared inside a method is called a_____variable
a. Local   b. Private
c. Static   d. Serial

22. _____object can help you maintain data across users.
a. Session object   b. Server Object
c. Response Object   d. Application Object

23. Which of the following is not a member of ADODBCommand object?
a. ExecuteScalar   b. ExecuteStream
c. Open   d. ExecuteReader

24. The .NET framework which provides automatic memory management using a technique called _____ ?
a. Serialization   b. Garbage Collection
c. Assemblies   d. Overriding

25. _____ ensures that the user does not skip a form entry field.
a. RegularExpressionValidator   b. CompareValidator
c. equals( ) method   d. RequiredFieldValidator
