Agriculture has always been the backbone of Indian economy. We have started cultivating various types of crops since the Green Revolution. There are three major types of crops that are grown by our farmers. Kharif or monsoon crops are the first variety of Indian crops. The Kharif season generally starts from June to September. Rice, Maize, bajra, soyabean, groundnut, cotton etc. are all types of the Kharif crops. The Rabi crops are the another way of cultivating crops popular in India. For the cultivation of this type of crop the irrigation facility is very essential. The main variety of Rabi crops are wheat, barley, musterd, green peas etc.

Third Variety of Indian crop is Zaid crops that grow in a short time between Kharif and Rabi season in the months of March to July. They are pumpkin, Bitter ground, and cucumber.
